- Combines hand dryer, soap dispenser and water tap in one location.
- No dripping on the floor. No extra floor space needed for hand drying and washing.
- Its plug-in back plate design ensures easy install and maintenance, allowing control box to be exchanged by a non-electrically qualified person.
- An intelligent heating system will detect the ambient temperature of your washroom, automatically adds heat to the airflow if it senses a room temperature drop below 25°C.
- Fitted with a HEPA filter to remove 99.9% of bacteria and viruses from the drying air.
- Designed to complement modern washroom with a complete range of Soap Dispenser, Auto Tap and High Speed Hand Dryer and for space saving.
- Tap colour options with PVD finish
